## TWO FULL SHOWS FOR MIDGETS AT ORPHEUM TONIGHT

Orpheum patrons who have waited a year to see the Singer's Midgets in their sensational vaudeville show will have their last opportunity today. There will be two complete performances at the Orpheum tonight, starting at 7:30 and 9:15.

Because of the crowds reserved seats will not be held longer than 7:45. This arrangement has been made by Manager J. F. Goss to clear the house completely after the first show, so that a large crowd can be accommodated for the second performance beginning at 9:15.—Adv.

### BOTTLE CRATE MAKES GOOD TOOL RACK

A wood crate such as is used as a container for either one or two dozen bottles of soft drinks is convertible into a very substantial and useful tool rack for private garage or workroom uses. All that is needed is to saw the part diagonally across and compartments of various lengths are provided to accommodate tools. The container can be made into a fixed shelf by nailing on to the wall, or a small handle attached to the top makes it a portable member. The tools can be arranged in the case for ready finding, whereas with a simple tool kit much searching is usually necessary to obtain the desired tool.

### TAKES A BUS TO CHURCH.

In order to accommodate children who live in the remote south end, one of the Hartford, Conn. churches has put into service two passenger busses, which make regular trips on Sundays, so Johnny goes back to Sunday school in state.

### EASY METHOD TO STOP LEAKY VALVE

Take out the valve or the valve spring, slide the little rubber gasket down toward the spring and invert the gasket, then slip it up in its original place, put the inside back in the valve and tighten. This will stop the leak nine times out of ten. If the rubber gasket seems to be hard it will be of no use to try this, as you will tear the gasket and ruin the valve inside for any future use. Dirt on the rubber washer or on the valve seat will cause a leakage which, though slight, makes it necessary to replate tires too often. This dirt makes its way into the valve because a cap is left off.

### SHIP BY TRUCK

Cy Perkins is a farmer. Back in eighteen ninety-three, he drove to town each day. To sell his eggs to you and me. We got them fresh right off the farm. A dozen for ten cents. But now—Alas! How times have changed. The difference is immense.

Cy saves his eggs until he gets enough to ship in crates. The railroad takes them in to town. And charges heavy rates. They're put in storage—months have passed. Before they reach the store, and we take home a dozen. At a dollar ten or more.

Not only eggs, but all produce. Costs more and more each day. Because the growth of cities. Pushed the farmer miles away. The railroads and the middlemen—The clever profiteer—All get their share and that's what makes The things we eat so dear.

### DEMAND FOR EXTRADITION.

PARIS, Jan. 17.—The supreme council's letter to the Dutch government demanding the extradition of former Emperor William has been sent to that government. It was forwarded officially during the night.

## Dissatisfied Wife Returns to Husband

After having won a suit for divorce against Leslie Hollister, five months ago on the grounds of nonsupport, Mrs. Hollister has caused her decree to be set aside and has returned to her husband.

Petitions filed by Mr. and Mrs. Hollister show that when he returned from service overseas he undertook a business deal in Salt Lake. His obligations were so heavy that he could not properly support his family.

During the past five months Hollister has prospered to the extent that he can now successfully maintain his household.

## SPORTS AMATEUR ACTIVITIES

Basketball is doomed for one of the greatest seasons in history in Utah if the present start obtained throughout the state is to be taken as a comparison of past years. This year in Utah practically every high school and college in the state have teams entered in the various leagues. Ward teams are in the fray, American Legion quints are winning games, Commercial leagues have been started in four cities, and all in all, the game, like football, is coming back with a vim.

Hoop prospects at the Weber Normal college appear to be bright. Coach Malcolm Watson has some first class men in harness and expects to win the local division title hands down. With Lindsay, Critchlow, Doney and others playing stellar ball the Weber mentor is out after the state title.

At the Ogden high school the indoor game is attracting the attention of the entire school. Large crowds are attending the games and Coach Douglas expects to see the game placed on a par with football if the present attendance and interest hold good.

Thomas and Skeen are playing wonderful ball for the Tigers. Both men stand out head and shoulders above the other members of the Tiger team. O'Keefe is also playing great ball.

With the indoor A. A. U. track and field meet but a month away Ogden track stars are expected to be in prime condition for the doings at Salt Lake when the gun sounds for action. Nelson Norgren, former University of Chicago athlete star, later mentor at the University of Utah, is in direct charge of the meet. It is expected that Hutton and O'Keefe will enter under the colors of the Ogden high school.

Harry Bagley, star high jumper of the Ogden high school track team in 1918, will in all probability enter the indoor championships at Salt Lake. Bagley is rated as one of the best aerial men in the state. He won several events while in the service.

Four Utahans are expected to show a world of class in the Olympic games at Antwerp next summer. Greed Hammond, Clinton Larson, Alma Richards and Bob Martin are the men that are expected to win laurels. Three of the men are sure point winners.

Louis Falck, star Utah Aggie athlete, has turned his hoop suit in at the Aggie fair, according to information received here. Falck was chosen unanimously as the quarterback for the Rocky Mountain conference last fall and is rated as one of the best stars in the state. The reason for his action was not made known.

The mile and half-mile events in the big indoor track and field meet at Salt Lake should be hummers. With Bank Brown, Sayman Kerr, Jacques, Bob Martin, Ted Johnson, and numerous other stars in action, the fans should see a record breaking race. The indoor record for the state is held jointly by Bob Martin and Al Warden, the time being 4 minutes and 42 seconds flat.

## FAST GAMES ON CARD FOR COMMERCIALS

### Teams Primed for Second Series of Games; Rivalry Keen; Schade is Leader

With the first set of games in the Ogden Commercial basketball league played and with the Ogden Standard and Never-Rip teams winners the rivalry in the games for next Wednesday evening is intense. In the games last Wednesday evening the Standard and Never-Rip aggregations won hands down from their opponents but the story may be different this week.

In the games scheduled for Wednesday evening at the Ogden high school the fans should see plenty of competition. In the first melee of the evening the Ogden Standard aggregation will clash with the Buchmiller-Kaplan team. Since the defeat of last week the Buchmiller-Kaplan team has secured the services of a number of stars and the game between these two aggregations should be a thriller.

Lee Richards and Len Couch, the stellar forwards of the Standard aggregation played stellar ball in the opening game and are looked upon to show additional class next Wednesday. Lindsay, Madsen and Critchlow are also expected to carry the burden of attack with their co-players.

Douglas, the star guard of the Buchmiller-Kaplan team is whipping the players into condition and expects to give the Standard players a real battle.

### Treat Promised

In the second melee the fast Never-Rip aggregation will mingle with the Southern Pacific. This contest should be an exciting one. Both aggregations have some classy players in harness and the game should be close from start to finish. In the opening encounter last Wednesday the Never-Rips showed class and they are favorites to win over the shopmen.

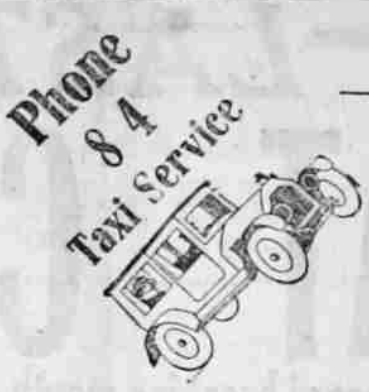

However, the railroaders are out after victory and they expect to reverse the scores on their opponents.

The Southern Pacific aggregation is composed of some classy players, but the majority of them are out of condition, once in condition they will be a hard team to defeat. Swainston and Jensen played fine ball for them in the first game.

Lindsay and Schade, the forwards of the Never-Rip team stand out head and shoulders above the other forwards thus far in scoring. Both men have started out after honors with pepper galore.

### Leaders in Scoring

The three leaders from the three positions in scoring follow:  
Forwards—Schade, Never-Rips, 21

DAY AND NIGHT SERVICE

## WEATHER FORECAST

WASHINGTON, Jan. 17.—The weather predictions for the week beginning Monday, are:  
Upper Mississippi and lower Missouri valleys. Occasional snows indicated over north and snow or rain south portion until after the middle of the week.  
Temperature will average below normal over north portion and nearly normal south portion.  
Northern Rocky mountain and plateau regions. Frequent local rains or snows indicated over the northern portion; generally fair over south portion; nearly normal temperatures.  
Southern Rocky mountain and plateau regions. Generally fair with nearly normal temperatures.  
Pacific states. Frequent rains in Washington and Oregon, probably some snow east of the mountains; generally fair in California except occasional rains extreme northwest portion; nearly normal temperatures.

## Nichols Chosen to Attend Conference

Professor E. W. Nichols of the Weber Normal college has been elected as delegate to the Pacific States Conference of the American Federation of Musicians, to be held in San Francisco, on, or about February 2, 1920. Professor Nichols has received his official instruction from A. A. Greenbaum, secretary of the San Francisco local and will go to San Francisco before the date of the conference.

## Blanche McKey Praised for Success of Play

Numerous letters of praise and appreciation are being received by Mrs. Blanche McKey, head of the oral expression classes of the Weber college, for the unique success of the alumni play, "The Big Idea."

## Conspiracy Among Bank Clerks to Use Funds

HOBOKEN, N. J., Jan. 16.—An alleged conspiracy among a coterie of bank clerks by which bank funds were advanced surreptitiously to outsiders for stock market speculation is believed by agents of the department of justice to have been uncovered tonight with the arrest of four men in adjacent Jersey towns. The prisoners were held in high bail for the federal grand jury by United States Commissioner Samuel Besson.

## Weber College Ready for Large Registration

The Weber Normal college has made exceptional preparation for a large registration, January 22, 1920. Additional class rooms have been put in shape and several new teachers will be added to the faculty.

The English department, which has been decidedly overcrowded, will be placed on a standard second to none in the state.

The following courses are offered to those who register for the second semester:  
English civics, general science, oral expression, glee club, choir, carpentry, theology, mathematics, art, domestic science.

The second semester opens January 20, 1920.

## HIGHWAYS TO REACH ISOLATED DISTRICTS

### Bureau of Public Roads to Perform Valuable Work in Parts of Utah

The work of the bureau of public roads has expanded greatly during the past year both in the post road and forest road sections.

The bureau, represented by District No. 12, Ogden office, has completed the following work in the year 1919: 144 miles of preliminary investigation; 361 miles of location survey; 262 miles of design and plans; and 91 miles of construction.

This work is mainly in Utah, Idaho and Nevada, with small amounts in Arizona and Wyoming. District No. 12 covers the same territory as the local forest service district No. 4. To complete the work now on hand there will be made 110 miles of plans from surveys made in 1919. This work will be completed in about 2 months. During the year 8 contracts were let aggregating 134 miles of which only 70 miles were constructed. In addition 21 miles were constructed by day labor by the bureau. To complete this work already begun it is expected that 228 miles will be constructed this season.

At the beginning of the working season construction will be resumed on seven unfinished contracts and on five unfinished day labor projects. In addition ten new projects will probably be advertised in whole or part for letting between now and May 1. This will require 22 engineers in charge of work, together with the administrative and clerical force in the office, as well as the engineering crews for the construction and surveying parties. The most of the work in 1920 will be construction of roads already surveyed and planned, but about 200 more miles will be surveyed.

## Spain to Organize Economic Conference

MADRID, Friday, Jan. 16.—The Republican group in the chamber of deputies today introduced a bill under which the Spanish government will organize within one month an economic conference at Madrid at which all the people of Spanish origin in North, Central and South America as well as Portugal and the United States will be represented.

The object of the organization is the foundation of an international bank whose aim will be to regulate exchange between the countries represented at the conference.

The town which claims to be free of profiteers, is also free of that which is profitable.

In Nevada the Austin-Eureka is on the Lincoln highway, the Tonopah road and Current Creek roads are on the Midland Trail.

Grand Canyon Road. In Arizona the Grand Canyon highway leads from southern Utah to the north rim of the canyon. Other projects in each state are of local importance and open communication with isolated sections. Coal, timber and

grazing resources are released by these projects while the scenic and recreational features are brought within the reach of the general public.

In order to carry on this work 32 automobiles and 13 trucks have been received from the army. Two hundred fifty tents and many other minor articles of survey, construction and camp equipment have been received from the same source. To store this when not in use land has been leased from the Bamberger Co., at the corner of Thirty-first and Lincoln avenue and a storehouse has been recently built. It will probably be necessary to construct another storehouse unit in the near future.

In post road work on the federal aid roads the Ogden office is confined to the two states of Utah and Nevada. In this work the states do the surveying, designing and contracting. The bureau exercises a control in an advisory capacity and inspects and approves or disapproves the post road projects, and the work done upon them. In this work 50 per cent of the construction cost is usually paid by the federal government.

### Engineer Assigned.

A. B. Brown, highway engineer, has been assigned to the office to assist in the post road work. Activity in this branch of the work has been maintained, the weather having stopped only three projects in the two states, and only temporarily interfered with several others.

In order to expedite the work of the bureau a disbursing agent is attached to the office, who audits and pays bills of the bureau on the post road, forest road and the irrigation investigation work done in the west. The irrigation work is under the direction of Doctor Fortier, who is not attached to the Ogden district, but working under the direction of the Washington office of the bureau of public roads. A recent instance of his work is familiar to Ogden people in the investigations conducted for the development of a greater supply of water for Ogden and vicinity from the Ogden river.

### Charlie Chaplin in "A Night at the Show" and William Duncan in "Smashing Barriers" at the Lyceum today.
